## A design that embraces unique appearance with distinctive simplicity

When you combine the unique lustrous appearance, unlimited chromatic designs, sublime finishes and durability of our products you can't help become addicted by their allure.

The Basin Lab manufacture handcrafted bathware from a pure source, low VOC resin composite we call Oxyform™ designed by us for our exclusive products.

Apart from it's beautiful lustre – Oxyform™ is virtually indestructible – chip and crack resistant plus, anti-corrosive and resistant to most daily use, real world products. An added benefit is our products are strong yet lighter in weight than most alternative bathware materials.

Our products are individually handcrafted in our workshop - each piece is created unique and therefore Oxyform™ products can display slight variations in shade, thickness and micro bubbles which are natural reactions in the curing process and are considered to be authentic, inherent characteristics of the products and not regarded as defects. Not suitable for outdoor use. It is recommended to avoid extended UV light exposure to retain your lustrous colour and finish.
