# THE BASIN LAB® iLLUMi™ Lightbox

The iLLUMi™ electrical system is 24 Volts (Low Voltage). You have your electrician connect it to a transformer. We recommend 24 V (low voltage) – IP67 – 30Watt – dimmable – DC – to suit AS/NZS 60598.1 and AS/NZ 60598.2.1. The electrician can wire it to a light switch, allowing operation from there.

There is also the option of having your electrician install a Movement Sensor into the light switch, allowing the basin to turn on and off with movement, essentially turning your basin into a night light. Always ask your electrician for their opinion.

**System must be connected by an electrician**
